20. YILINDA, AKE...

1995 yılında kurulduğumuz günden itibaren, sorumluluğunu üstlendiğimiz her projede “üretken, çözümcü ve sürdürülebilir” olmayı ilke edindik. Ülke menfaatlerimizi gözeterek sektörümüzdeki ihracatımızı maksimum seviyeye taşımamızın önemini düşünerek çalışıyoruz.

Önümüzdeki yıllar için de net hedeflerimiz var. AKE kültürünü yansıtan inovatif ürün ve hizmetlerimizle her geçen yıl daha fazla kullanıcının tercihi olmak, üretim birimlerimizi ve istihdamımızı katlayarak artırmak... Ve elbette hedefimize ulaşmak için ihtiyaç duyduğumuz gücün, işçisinden mühendisine, bayisinden satış elemanına kadar AKE bayrağı altında birleşen herkesin akıllarında ve yüreklerinde olduğunu biliyoruz. İşte bu güce olan inancımızla, geleceğe büyük bir umut ile bakıyoruz. AKE’yi Türk asansör sektörünün lokomotifine haline getiren, bu yolda bizimle birlikte yürüyen herkese can-ı gönülden teşekkür ediyor, daha nice yıllarda ve başarılarında hep birlikte olmayı diliyoruz.

Sevgi ve Saygılarımla...

20 YEARS AKE...

Since we established in 1995, we adopted being “productive, solver and sustainable” as a principle in all projects which we took responsibility. We carried out lots of important projects in Turkey with our own production system technologies. Today, we became an ambassador introducing our country’s values as a representative Turkish company not only in our territory but in the whole world.

We have clear-cut aims for the next years... Increasing our number of companies such as piles at the four corners of the earth, being the preference of more people by every passing year with our innovative products and services reflecting AKE culture, incrementally increasing our production units based in our country and employment...And of course, we know that the power we need to reach our aims is in the minds and hearts of all merging under the title of AKE from workers to engineers, from distributor to sales representative. With this faith in this power, we are full of hope for the future. We thank everybody who transformed AKE into locomotive of Turkish elevator sector and walked this path along with us by heart and wish many successful years together.

Sincerely...

Çetin KESKİN

Yönetim Kurulu Başkanı
Chairman

ÜRETİMDEKİ ESTETİK ÇİZGİLER PRODUCTION WITH AESTHETIC LINES

AKE kişisel beklentilere uygun kabinler üretir. Bu üretim süreci, iç mimari, resim ve endüstri tasarımı disiplinlerinin neredeyse tümünü içerir.

Bir üretimi birçok şey etkiler; sektörün kazanımı olan yeni malzemeler, yeni ürün ve renkler, doku dengeleri, moda, marka ve kurumsal görsellikler. Tüm estetik yapı, her bütçeye göre ve mühendisliğin gerektirdiği hiçbir detaya engel olmadan gerçekleşir.

AKE produces with aesthetic lines according to the personal expectations. This production process comprehends nearly all types of interior architecture, painting and industrial design.

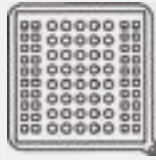

Lots of things impact on a production; new materials of sectoral gain, new products and colors, texture, balances, fashion, brand and institutional visualizations. Aesthetic structure as a whole, takes shape in according to all types of budgets and without obstacles of engineering requires.

MAKİNE DAİRESİZ / MACHINE-ROOMLESS

Makine dairesiz sistemlerin avantajları;
The advantages of the machine-roomless elevator systems;

- 1 Dişlisiz motorun ekonomik boyutları ile bina hacminde tasarruf sağlar.
 - 2 Son teknoloji kontrol teknikleri ile eşsiz konumlama hassasiyeti sağlar.
 - 3 Her çeşit binaya kolaylıkla monte edilir.
 - 4 Kaldırma ünitesinin üstün performansı, sessiz ve konforlu bir seyir sağlar.
 - 5 Daha az demeraj akımı çeker ve daha az enerji tüketir.
 - 6 Hızlı ve etkin montaj yapılmasına olanak verir.
 - 7 Optimum performans.
- 1 With gearless motor's economic size provides save on the volume of the building.
 - 2 With latest control techniques provides high sensitivity positioning.
 - 3 This system is easily mounted to all kinds of buildings.
 - 4 Lifting unit with superior performance provides quiet and comfortable movement.
 - 5 Consumes less energy and draws less starting current.
 - 6 Allows for fast and efficient installation.
 - 7 Optimum performance.

DÜNYA DÜZDÜR, BİR ADIM YETER

THE EARTH IS FLAT, ONE STEP IS ENOUGH

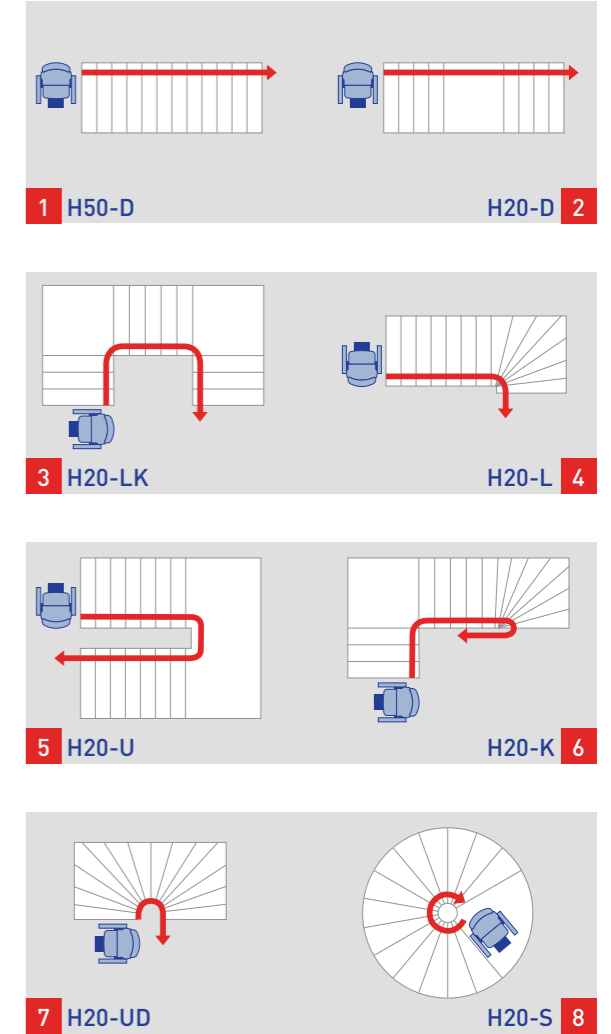

İşimiz bu... Gündelik yaşamda önünüze çıkan bütün engelleri yok etmek. Varacağımız yerle aramızdaki basamakları kaldırmak. Farklı seviyeleri hizaya getirmek, katları ve eğimleri bedensel formumuzu hiç değiştirmeden aşmak. İnsanın dimdik durması için imkansız bile inanmak, çünkü dünya düzdür. İstisnalar varsa düzeltiriz.

This is our job... To destroy all obstacles that come to your way. Remove the stairs between us and the point that we want to arrive. To align the different levels, negotiate the floors and inclinations without changing our physical form. Believe impossible to stand straight, because the earth is flat. If there are exceptions, we correct them.

AKE; her türlü merdiven tipine uygun çözümler üreterek, zamanı yakalamanızı sağlar.

Through creating suitable solutions for all kind of stair types, AKE gives chance to be free.

BENİM ASANSÖRÜM, BENİM KONFORUM... MY ELEVATOR, MY COMFORT...

AKE 20 yıldır konforlu ve güvenli insan transferiyle kullanıcıların kalbine ulaşarak, yeniliklerin beklendiği marka olmanın gururunu paylaşmaya devam ediyor. Kuyu dibi ve son kat ölçüleri düşük, hatta olmayan mevcut ve yeni yapılara asansör çözümü olarak tasarlanmış bir sistemimizi AKE konforu ile sunuyoruz.

AKE continues to share the honour of being a brand from which innovations are expected by reaching the hearts of consumers with comfortable and reliable human transfer for 20 years.

We present our system with AKE comfort, which is designed as an elevator solution for new structures having low, even non-existent pit depth and head room dimensions.

AKEMYLIFT

Q-LINE

TEKNİK ÖZELLİKLER / TECHNICAL INFORMATION

- Makine dairesiz sisteme sahip olup dişlisiz motor ile çalışır.
- Kuyu dibi min. 250 mm, son kat ölçüsü ise min. 2700 mm'dir.
- Maks. 1.00 m/s hızla hareket etmektedir.
- 320 kg, 450 kg ve 630 kg olarak farklı taşıma kapasitelerine sahiptir.
- Maks. seyir mesafesi 5 durak / 15 m'dir.
- TS EN 81-1 + A3:2011, TS EN 81-21:2011 standartlarına ve 95/16/AT Asansör direktiflerine uygundur.
- Farklı yönlerden giriş seçenekleri mevcuttur.
- Özel tasarım modüler çelik ile montajı kolay olan civatalı konstrüksiyondur.

- It has a machine roomless system and works with gearless motor.
- Pit is min. 250 mm, head room measure is 2700 mm.
- Acts with maximum 1.00 m/s speed.
- There are three different capacities as 320 kg, 450 kg and 630 kg.
- Max. travel distance is 5 stops /15 m.
- It's in accordance TS EN 81-1 + A3:2011, TS EN 81-21:2011 standarts and 95/16/AT lift directives.
- Entrance from different directions is available.
- It is an easy installation bolted connection construction with special design modular steel.

TEKNİK ÖZELLİKLER / TECHNICAL INFORMATION

- Makine dairesiz sisteme sahip olup dişlisiz motor ile çalışır.
- Kuyu dibi min. 300 mm, son kat ölçüsü ise 3000 mm'dir.
- Maks. 1.6 m/s hızla hareket etmektedir.
- Taşıma kapasitesi 240 kg ile 1000 kg arasında değişmektedir.
- Maks. seyir mesafesi 60 m'dir.
- TS EN 81-1 + A3:2011, TS EN 81-21:2011 standartlarına ve 95/16/AT Asansör direktiflerine uygundur.
- Asansör kuyu duvarlarına ihtiyaç duyulmamaktadır.
- Sahip olduğu özel kayışlı sistem ile çelik halata göre daha uzun ömürlüdür.

- It has a machine roomless system and works with gearless motor.
- Pit is min. 300 mm, head room measure is 3000 mm.
- Acts with maximum 1.6 m/s speed.
- The capacity differs between 240 kg and 1000 kg.
- Max. travel distance is 60 m.
- It's in accordance TS EN 81-1 + A3:2011, TS EN 81-21:2011 standarts and 95/16/AT lift directives.
- There is no need for shaft walls.
- Comparing to steel rope system, it is more durable with its special belt system.
